

Message to Stefano (cc Eleonora) — US Asiago campaign launch + freight ask

Draft for Rick to review and send — I won't send anything. Send-from: Sales@montitrentini-usa.com. Business phone intentionally omitted (line not set up yet — OpenPhone decided, see chat). **Attach when you send (all PDFs in pdf_out/)**: Asiago sell sheet · 3-touch email sequence · social drafts (launch batch + starter) · this note (shipping comparison in Appendix A). **Note**: the sell sheet goes as a **PDF attachment** — designed HTML won't render in email bodies.

To: Stefano · **Cc:** Eleonora **Subject:** Launching the US Asiago campaign — email + social (Eleonora, the social piece is for you)

Hi Stefano, and ciao Eleonora (cc'd) —

Why I'm writing: the national US **Cheese Shop & Boutique Grocer** campaign is ready to go. I want to walk you through it, hand the social piece to Eleonora, and ask one freight question so I can start putting real prices in front of buyers. I've kept this easy to skim — here's the map:

In this email 1. The campaign, in one paragraph 2. How the email outreach runs (*sequence attached*) 3. **For Eleonora** — the social drafts to run (*attached*) 4. One ask for Stefano — SEAFRIGO freight 5. Attachments

1. The campaign. As discussed, I'm moving forward on a national Cheese Shop & Boutique Grocer campaign — starting with email outreach, followed by a social piece I'll hand off to Eleonora. I'd suggest we follow up with Eleonora and Maria Vittoria soon to coordinate. The positioning is *Product of the Mountains* — authentic Italian Alpine Asiago, Casa Finco casari dal 1925, whole wheels and vacuum-packed quarters, already in stock stateside.

2. How the email outreach runs. A gentle 3-touch sequence (full copy attached) — it opens a conversation, it doesn't push an order:

- **Touch 1 (Day 0)** — a warm hello + find the right cheese buyer; introduces the three Asiago (Fresco, Stagionato, Vecchio) and offers a taste. Sell sheet attached.
- **Touch 2 (Day 4)** — why the mountain is the difference: everything made at home in Grigno, milk grazed in the Dolomites' shades, and the real sustainable operation behind it.
- **Touch 3 (Day 9)** — a short, low-pressure nudge: happy to mail a sample, happy to be pointed to the right person.

3. For Eleonora — the social piece is yours. Eleonora, this part's for you. The attached drafts cover **Instagram, Facebook, X, TikTok scripts, and a light blog post** — all in

Monti’s voice, with a 2-week posting calendar and an image map to our asset library. They’re ready to run and localize; nothing is locked, so make them yours. Could we find time soon to coordinate the rollout? Maria Vittoria, I’d love to include you as well.

4. One ask for Stefano — freight. The only thing holding back real pricing is shipping (the materials say “by inquiry” for now). Two lanes I’d like to price, and I think **SEAFRIGO** is the natural partner since they already hold our cold chain near the NY/NJ port:

- **Direct-to-retail** — refrigerated LTL of whole + quarter wheels to shops nationwide.
- **Direct-to-consumer** — insulated/gel-pack parcel for samples and any consumer e-commerce.

Could you point me to the **right SEAFRIGO US contact**, and let me know whether they handle the DTC parcel lane or only retail freight? I’ve attached a benchmark comparison and a US cost map (Appendix A) to frame it — public numbers, not quotes; I’d happily replace them with SEAFRIGO’s real rates.

5. Attachments. Asiago sell sheet (PDF) · 3-touch email sequence (PDF) · social drafts — launch batch + starter (PDF) · shipping comparison (Appendix A, below).

Even a quick steer moves this forward — no need for the full detail at once. Grazie to you both.

Warmly, Rick Posada Monti Trentini — USA Sales@montitrentini-usa.com · @montitrentini

Appendix A — Shipping comparison + US cost map

Read as: benchmark ranges from public 2026 sources to frame the SEAFRIGO ask — **not quotes**. Cheese ships **refrigerated** (32–40°F, gel packs; dry ice only if transit runs long), with a forgiving 4–6 hr window. DTC shipping typically runs **15–30% of order value**.

The 5 providers

Provider	Type	Direct-to-retail (reefer LTL)	DTC parcel + cold pack	US footprint	Best fit for Monti
SEAFRIGO (incumbent)	Cold-chain forwarder + 3PL	Yes — domestic trucking + co-pack	Unclear — confirm	NY/NJ port + Miami; global import	Already our import + cold-storage partner; one-stop if they do DTC
RLS Logistics	Temp-controlled 3PL	Yes	Yes — DTC fulfillment (NJ/PA/UT)	East Coast + UT, nationwide transport	Strongest DTC fit; East-Coast like SEAFRIGO
Lineage	Largest cold	Yes —	Limited / via	National,	Scale +

Logistics	3PL (2.1B cu ft)	national	partners	deepest network	national retail reach
Americold	#2 cold 3PL (1.3B cu ft)	Yes — national	Limited	National	Retail distribution at scale
FedEx / UPS cold parcel	Parcel carriers	No (parcel, not freight)	Yes — the DTC last mile	National	The actual DTC cost driver; pair with any 3PL

US cost map (from a NY/NJ cold-storage origin)

Region	Reefer LTL — per pallet (retail)	DTC insulated parcel, 5–10 lb, 2-day
Northeast (local, <300 mi)	\$150–\$300	\$40–\$60
Mid-Atlantic / Southeast (300–1,000 mi)	\$400–\$800	\$45–\$70
Midwest (regional–long)	\$400–\$900	\$50–\$75
South Central / TX (long)	\$800–\$1,500	\$55–\$80
Mountain West (cross-country)	\$900–\$1,700	\$60–\$90*
West Coast (cross-country)	\$900–\$1,800	\$60–\$90*

* Far zones may exceed 2-day transit — add gel packs or dry ice (transit time, not distance, sets the coolant). Reefer LTL runs ~**\$2.56/mi Northeast** up to ~**\$3.39/mi South** (national reefer avg ~\$3.26/mi, May 2026). DTC parcel = freight (\$30–\$50 for 2-day, 5–10 lb) + cold packaging (\$8–\$20). **Serve the Northeast/Mid-Atlantic first — cheapest from NJ.**

Appendix B — The 3 prospect emails (reference)

(Full file: *Asiago_Cold_Email_Sequence.md*. Pricing currently “by inquiry” — what the SEAFRIGO answer lets us replace with real numbers.)

Touch 1 (Day 0) — Introduction + find the right person. Subject A: *A hello from a family cheesemaker in the Alps* / Subject B: *Authentic Alpine Asiago — and the right person at {{company.name}}*. Intro + two asks (right buyer? send a taste?) + the three-Asiago ladder, whole/quarter wheels in stock stateside; sell sheet attached; no pitch.

Touch 2 (Day 4) — Why the mountain is the difference. Everything at home in Grigno; Dolomites-grazed milk; sustainability (solar ~650,000 kWh/yr, ~80% self-sufficiency, ~1,000 t CO₂ avoided/yr). Offer a Vecchio sample or 15 minutes.

Touch 3 (Day 9) — Still glad to send a taste. Short, low-pressure; offer to mail a sample; ask for the right contact; thank-you close.
